PIONEER DM DITCH MAGNETS

The PIONEER DM Ditch Magnet, completely encapsulated in an abrasive resistant, non-corrosive element is the ideal tool to catch the metal particles missed by the shale shaker. The smooth exterior allows straightforward washing in one operation.

For maximum efficiency, the Ditch Magnet should be suspended in the Mud Ditch or alternatively in the shaker discharge.

The Ditch Magnet illustrated is DM 3690, this unit can hold upto 90 lbs. of mill cuttings in suspension, other sizes and capacities are available on request.

Pioneer manufacture a wide range of Fishing and Retrieval Tools. Contact our Sales Office and discuss your requirements.

“QUALITY + DELIVERY IS OUR PRIORITY”
