PIONEER PACK-OFF ASSEMBLY

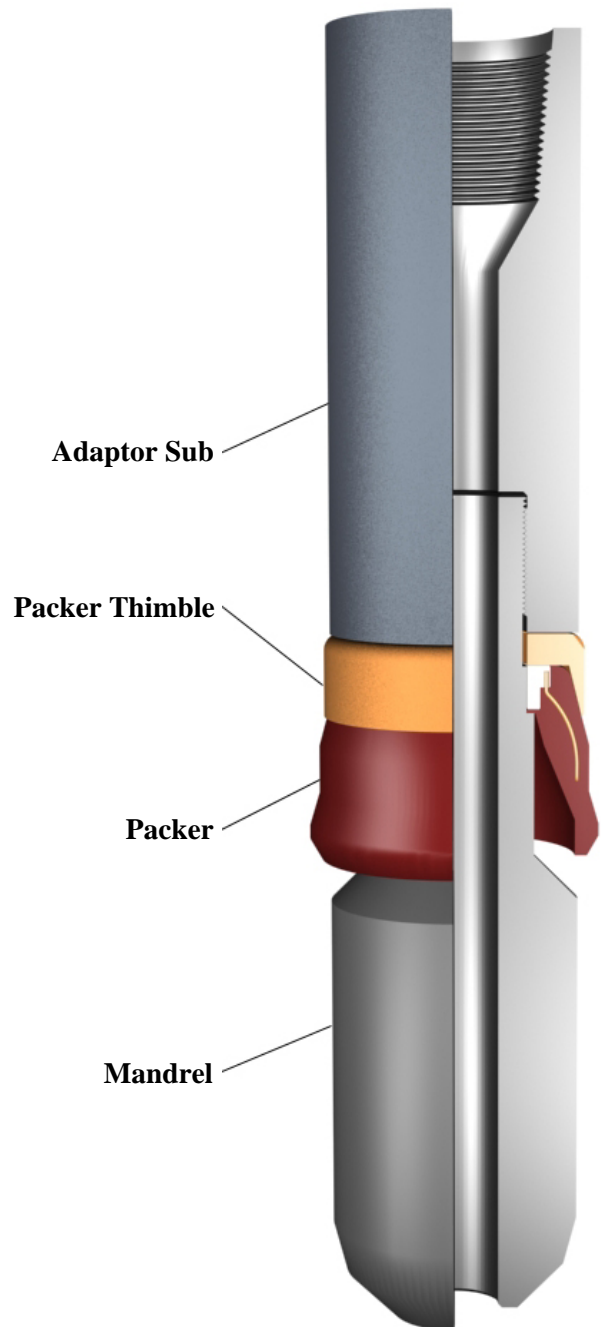

The Pioneer Pack-off Assembly, when attached to the Pioneer RS series Releasing Spear via a box/pin connection, permits the packing-off of a fish to facilitate full circulation through the fish.

The Pack-off Assembly consists of an Adaptor Sub, Packer Thimble, Packer and Mandrel.

The Mandrel of the spear pack-off may be ordered bull-nosed or with a pin connection for further tool attachments. The Adaptor Sub can be ordered with a customer-specified connection, as needs require.

Wire-energised Packer/Swab cups are supplied as standard. Solid nitrile cups can be supplied on request. Both options have integral steel clamping bushes.

Please call our Sales Office to discuss your requirements.

“QUALITY + DELIVERY IS OUR PRIORITY”

As the policy of Pioneer Oil Tools is one of continual products improvement we reserve the right to change designs or specifications without notice.
