PIONEER SHORT CATCH OVERSHOT

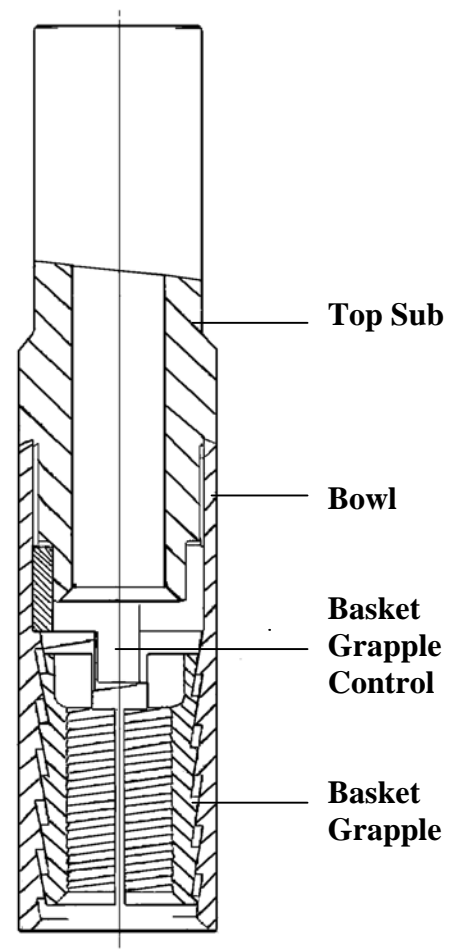

The Pioneer range of Short Catch Overshots, similar in operation to that of the standard Releasing Circulating Series but without the facility to pack-off, is designed to catch short fish.

The simple, four part assembly includes a coarse thread connection between Top Sub and Bowl to accommodate greater abuse than the normal. Each Assembly is designed for a maximum diameter of fish but can be dressed with smaller grapples as required.

Accessories e.g. Extension Subs available on request.

Short Catch Overshots are engaged by slowly lowering the Assembly onto the fish whilst continuing right hand rotation. To release the fish, bump down firmly and then slowly elevate the string, simultaneously rotating slowly to the right.

Note that Left Hand Overshots are also available, contact our Sales Office for details.
